PS4 Jailbreak – the Brazilian PS4 Jailbreak (2014)

Although not an actual “PS4 Jailbreak” that would allow to run unsigned code, it’s been confirmed that people have found ways to pirate games on the PS4, without the use for any advanced hack. With the use of a simple raspberry pi, electronics stores in Brazil have been able to dump the licenses of games from a PS4 to another, enabling them to pirate games. This technique is also known as PS4 NOR Cloning.

PS4 Jailbreak explained (the Brazilian Method)

In the Brazilian “Jailbreak”, it seems the PS4 NOR is dumped to a memory card. Reading/Writing Data from a PS4 that has the right games “activated” on it seems to be the technique that has been used by hackers in Brazil to Jailbreak the PS4. Videos have been showcasing the use of a Raspberry PI and free software JAISPI to perform the dump. Note that it is recommended that you do not try to reproduce this unless you know exactly what you’re doing.

It is believed a similar NOR dump technique has been used by the Brazilian stores selling pirated games.

PS4 Jailbreak News & rumors – Fake exploits.

Although there is real progress being made on PS4 Jailbreaks and hacks, several sites exist with the goal of tricking you, pretending they have a PS4 Jailbreak for you. We debunk a few of those below, as always, beware of bad sites. When a PS4 Jailbreak is made available for your PS4, popular scene sites such as us at wololo.net will be the firsts to let you know.

If you just found an unknown website that claims to provide a CFW or jailbreak for the PS4, be extremely careful. Such sites are usually trying to get you to answer some sort of survey in order to get the “hack”. This is how they make money in general (but this is not their only technique!), as they get paid for every person who completes a survey. These surveys will most of the time not lead you to anything, or in some cases they will let you download a file that has nothing to do with a PS4 jailbreak. Their explanations for the hack will usually be extremely fishy, for example asking you to copy some files on the PS4 hard drive without explaining how to actually do it, or things similar to that. They have fake comments on their site to make you believe their stuff is legit, and also use black hat techniques to build fake followers on twitter and facebook.

More generally, ask yourself about the odds that you are the first one in the world to find about a PS4 hack that nobody else knows about. Console hacking is our passion on this site, and we have dozens of community members scouting the internet for any verifiable piece of information. If something like that was legit, we would find out within hours. Again, when a PS4 jailbreak/Custom Firmware is made available, wololo.net and other reputable scene websites will be the first ones to let you know.

Please share this page with your friends whenever they think they have found a PS4 Jailbreak. This page will be updated with the latest progress on PS4 hacking.
